

# CARDIOVASCULAR ACADEMY XVIII

## Cardiovascular Risk Management & Diabetes

Young Cardiologists Working Group of RSC in cooperation with KALTUD

September 26-28, 2014

Moscow, Russian Federation

Dear Colleagues,

It is a great pleasure for me to announce and invite you to the upcoming **18<sup>th</sup>. CARDIOVASCULAR ACADEMY** meeting of the Young Cardiologists Working Group of the RSC on June 6-8, 2014 in Moscow together with Association for Quality in Medication from Turkey.

I am proud to let you know that the upcoming meeting will again be a multinational event: this time together with the attendance of cardiologists, internists and family doctors from neighbour countries.

In line with the previous meetings of our working group this meeting will be devoted to the 'Management of Cardiovascular Risk' and 'Management and Risk Calculation and Therapy for Diabetes as a Cardiovascular Risk Factor' in adult population.

As a tradition in our meetings since last 4 years, we will again be focusing on **Rational Medication for Cardiovascular Diseases** in line with the health politics of the Russian Federation and Republic of Turkey.

I am sure that the meeting attendees will be refreshed by evidence based updated data in line with new guidelines and financial regulations which will be presented by our panellists during the meetings.

Please join and share your daily experiences and questions in order to get the best out of 18<sup>th</sup>. Cardiovascular Academy Meeting.

I wish this new meeting of ours will be at least as satisfying as our previous meetings and will be a reference for all similar meetings in medical society.

I look forward to seeing you in the beautiful Moscow.

Ass. Prof. Dr. Anna Kontsevaya

Cardiovascular Academy Chair Person
