Dear Colleagues,

Based on the remarkable success of the Cardio Update in Germany for more than 10 years, we are pleased to present this concept now to a European audience. This is your chance to get updated in cardiology within two days. The most relevant clinical papers of the last year will be reviewed and put into perspective, and today's burning issues will be addressed by leading experts in their fields.

The scientific board has worked intensely to put together an attractive program. The faculty has been chosen from all over Europe and will bring their expertise and knowledge to this congress. All important fields of cardiology will be covered over two intense and exciting days. Both clinicians and practitioners will profit immensely from the lectures which will improve their clinical and practical knowledge as well as the quality of their daily work. Moreover, you will have the opportunity to interact with colleagues, exchanging experiences and information on current trends and future directions in cardiology.

Features of our congress include:

- Renowned experts in each field of cardiology will map out all major developments as published in international literature during the past year
- The entire field is covered by 14 one-hour-sessions so that participants will be fully updated within two days
- Unbiased medical content in presentations
- Presentations are handed out as print compendia at the congress and are available for download
- ePoster exhibition: Highlights of academic insights

Finally, there is no doubt that Vienna is an extraordinary and wonderful place to visit in May. We are very much looking forward to welcoming you there.

Sincerely

Michael Böhm

Kurt Huber

Andre Keren

Béla Merkely

Program

Friday		
	Welcome (admission and registration starts at 8:00)	9:15
	Heart Failure Michael Böhm (Germany)	9:30
