

III SAINT-PETERSBURG ARRHYTHMOLOGY FORUM

ARRHYTHMOLOGY WITHOUT FRONTIERS: FROM A RESEARCH LAB TO CLINICAL GUIDELINES

May 28–30, 2020

Dear colleagues!

Due to rapidly changing conditions, including changes in government policy regarding public meetings, the organizing committee of the St. Petersburg Arrhythmia Forum postpones the assessment and decision on the status of the event until April 27, 2020 (30 days before the start of the Forum), in order to take into account further developments. Current travel and meeting restrictions in the Russian Federation do not apply to May 2020. It is possible that the situation and restrictions change rapidly.

We emphasize that to date the holding of the St. Petersburg Forum has not been canceled or postponed, the event is planned on May 28-30, 2020. The program and event schedule will be posted on the website of the Russian Cardiology Society until April 1, 2020.

Regarding the format of the event, options for holding satellite symposia in the format of webinars are being considered. Industry exhibition might be replaced by video materials. Some lectures and reports can be presented in the format of video recording / video broadcasting.

We support each of you understanding your questions and worries regarding pressing issues. We believe that these circumstances will only strengthen our cooperation. Stay healthy and stay in touch!

Respectfully,
Chairman of the St. Petersburg Arrhythmia Forum,
Prof. Lebedev D.S.
